

### Project: Positive Felines

Our Positive Felines (FIV+) frequently need long term care in the rescue as finding new homes can take some time. If you would like to donate towards the upkeep of these sweet cats, it would go a long way to keeping them happy and healthy while they wait for that special forever pet parent and family. We at Animals Can't Talk Rescue and Adoption, Inc. do not euthanize unless the animal is suffering and has no hope of recovery. Such is not the case with these cats. Many FIV+ cats live long and happy lives with no incident of illness. The stigma of the disease is not unlike the difficulties that humans face who have contracted AIDS. FIV cannot transfer to humans or dogs. Even in other cats..."FIV is mainly passed from cat to cat through deep bite wounds, the kind that usually occur outdoors during aggressive fights and territorial disputes—[the perfect reason to keep your cat inside.](#)" (ASPCA)

If you can't adopt, please consider donating or sponsoring one of these cats. If you have fundraising abilities, please contact us.
