## New Building Proposal – Project Positive Felines

Many cats are infected with the feline aids virus or leukemia. These cats can live long lives, but must be kept separate from those not infected.

Our plan is to provide housing and care for these unfortunate felines. Animals Can't Talk Rescue and Adoption, Inc. and Creature Comforts Veterinary Service are working together to provide such a home. The animals will receive a safe environment, good food and needed medical attention until an appropriate family can adopt them.

We are also looking at commercial properties where we can sell our products (shirts, cups, pens, and tote bags) with our logo on it to help defray operating costs.

We wish to find a property that is closer to Creature Comforts in Saylorsburg. This will save on travel costs. The funding requested is for the housing. The entire amount would be used for either full purchase or a down payment on a property. Animals Can't Talk Rescue and Adoption, Inc. is a 501 C-3 organization which operates completely by volunteers.

This is our first attempt for capital funding. All other fundraising has been for spay/neuter/rescue. All monies are 100% used for the animals (their care/upkeep/health management), until adopted.
