

## Program Title: P.O.P. Prevent Over-Population

In order to effectively address the over-population, and reduce the number of domestic pets in shelters, it is imperative to have companion animals spayed/neutered. All animals taken into ACT are vet checked, given shots and spayed/neutered. ACT is a no-kill rescue that is also involved in TNR locally. We have flyers available during adoption days at PetSmart stressing spay/neuter.

Vet costs are very high. We need assistance to continue this vital work to avoid high shelter population and birth explosion in cats that are free roaming. Together, we can make a difference. Please help us with your kind donation.
