

Program Title: Thankful Cat Building Proposal

Our rescue always runs at full, or near full capacity. We require more space for the rescue.

During clean up time, we need an area to place the cats while the cages are disinfected and litter is replaced. The new area will also allow more room for the loose cats in the building during regular hours. We propose to add a sunroom for this purpose. It is cost effective and will give much needed space to the rescue.

Please, if you can donate toward the cost of this project, it will allow us to give the rescue cats a more comfortable environment, and make the clean up days easier for our volunteers.
